The elena pellet fire combines the latest technology with classy Italian styling. It's a fitting choice for architecturally-designed houses. Its output will warm an average-sized family home with up to three bedrooms.

**Optional extras**

- Cream
- Bordeaux

**Unit dimensions**

Height	1106 mm
Width	506 mm
Depth	563 mm
Hopper capacity	31kg

**Performance**

Efficiency	81 %
Maximum heat output	8.6kW
House type	up to 3 bedrooms

**Features**

- free-standing
- all steel construction
- glass-ceramic door, heat resistant up to 750°C
- automatic ignition and controls
- timer thermostat as standard
- function controls have graphic display
- and remote operation centrifugal fan for hot air circulation

A pellet fire will use between 50 and 75 twenty-kilo bags of pellet fuel a year (1 to 1½ tonnes) to heat an average-sized family home. Costs will vary depending on location and the severity of the winter. Nature's Flame pellet fuel:

- is made from 100% New Zealand-grown pine
- is available nationwide
- is easy to store
- is dry, light, clean handling and pleasant smelling
- costs less than electricity or gas for equivalent heat output
- made from waste wood
- creates low emissions and minimal ash residue
